Water Treatment

Technical Competencies

➤ **Bioenergy**

- Agricultural Biomass
- Forest Biomass
- Municipal Solid Waste
- Wood Waste Biomass
- Pyrolysis, Biochar
- Torrefaction, Biocoal
- Syngas
- Biomass Gasification

➤ **Biofuels**

- Biodiesel
- Renewable diesel
- Ethanol
- Butanol
- Biogas

➤ **Renewable Chemicals**

- Alcohols
- Organic Acids
- Ketones
- Platform Chemicals C1– C6
- Polymers
- Plastics
- Oleochemicals
- Polyols

➤ **Bio-industrial Processing**

- Algae Platforms
- Water Treatment
- Anaerobic Digestion
- Food Ingredients
- Animal Health & Nutrition

Professional Engagements

Expertise & C-level experience in bio-industrial processing, bioenergy, biofuels and renewable chemicals:

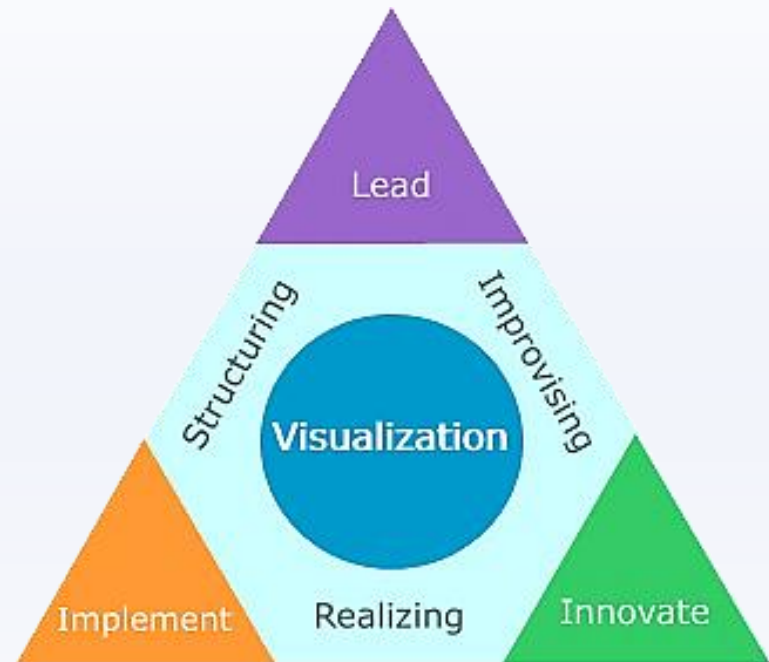

- Due diligence & strategic planning from start-up through commercialization
- Technology, market, & economic assessments
- Post-merger technical and management transition support
- Commercial readiness including risk assessment
- Interim executive & technical management
- Quality assurance & control
- Regulatory compliance
- Workforce development & training
- Process development & solutions
- Support services through scale-up, demonstration, & commercialization.
- Expert witness & litigation support

Coupling Business & Technical Competencies

Our thought processes are differentiated to offer clients a balanced perspective:

- Influential guidance
- Strategic direction
- Innovative ideas
- Knowledgeable
- Action oriented
- Tactical
- Insightful leadership
- Visionary thinking
- Planning
